Andersen. Uncompromisingly Good!

In the mat industry, Andersen mats are where design and function come together, where quality isn't compromised to meet a price point, and where solutions to your maintenance and décor problems come first. All Andersen mats feature a 100% customer satisfaction guarantee for the life of the product!

Andersen WaterHog mats were the first to incorporate bi-level rubber reinforced face nubs to trap more water and dirt and prevent pile crushing, giving you longer lasting, better performing mat protection. Andersen ColorStar mats were the first to take the fade resistant benefits of solution-dyed technology and make beautiful, fashionable mats- mats guaranteed against color loss for 10 years.

The Andersen Company is committed to reducing our environmental impact. We are continually improving our environmental performance as an integral and fundamental part of our business strategy and operating methods. We have reduced waste going to landfills by 80% and recycle most paper, metal, cardboard, plastic, carpet and rubber waste we generate. Our boilers burn "Yellow Grease" which is used cooking oil collected from restaurants. Our commitment is also evident in our development of over 25 mat styles that contain recycled raw materials including the WaterHog Eco line of mats that contain 100% post-consumer recycled PET fiber reclaimed from plastic bottles.

For over three decades The Andersen Company has been America's leader in innovative floor protection systems, industrial safety, anti-fatigue products and high performance entrance matting. So if you are looking for better ways to minimize maintenance, prolong floor surface life, reduce cleaning costs, improve safety or increase worker comfort ask for Andersen mats - your environmentally friendly choice.

Minimizing Maintenance with Mats

In hospitals, schools, hotels, offices, restaurants, theaters and industrial facilities, mats are the first defense to stop dirt and moisture from entering the building. Mats filter these contaminants from entering the facility saving hundreds even thousands of dollars a year in excessive cleaning costs and damage to interior floor surfaces.

Consider These Facts...

- **70% to 80% of dust, grime and dirt in a building is tracked in from the outside on people's feet—permanently damaging floors.**
- **One square yard of carpet can accumulate one pound of dirt a week—twice that in inclement weather.**
- **It is estimated that the cost to find and remove a single pound of dirt from a building can run in excess of \$600 in cleaning costs. As few as 150 people entering a facility can track in one pound of dirt in a 5 day work week costing over \$30,000 dollars annually to remove.**
- **By utilizing high performance entrance matting of at least 10' to 15' as recommend by the U.S. Green Building Council and the Carpet and Rug Institute you can capture as much as 85% to 95% of contaminants saving maintenance dollars and protecting building assets.**

An Effective Mat Program is the Answer

Entrance mats are the most effective way of stopping dirt and moisture at the door and keeping building maintenance costs to a minimum. They are also effective internally in high traffic areas or at service wipe-off regions such as factory entrances, entrances from kitchens to restaurant dining areas, freight elevator areas, office hallways, etc.

Mats are used throughout facilities in numerous other capacities where safety is a must and anti-fatigue comfort is essential to the health and well being of employees. Mats are also an excellent way to project a positive company image or as a message mat to convey messages to employees or customers.

To help select the proper mat for your individual need use our Mat Placement Guide with easy to read descriptions of the numerous matting types we make available. Once you have determined the matting type that best suits your need you will find a listing of each mat type in the table of contents to narrow your search for the correct matting solution.

Andersen has the right mat for every job.

Scraper Entrance Mats

Your First Line of Defense

Scraper mats are designed to stop mud and larger particles of dirt from being tracked inside buildings. These mats provide aggressive scraping action and trap dirt and debris in recessed areas until the mats are cleaned. Scraper mats can be used outside or inside and should be used in conjunction with a Scraper/Wiper mat and a Wiper mat.

Scraper/Wiper Entrance Mats

The Second Step to
Keeping Dirt Outside

Scraper/Wiper mats are designed to provide scraping action and wiping to further stop dirt and moisture from entering a facility. These mats are typically made of tough fabrics. They channel and retain dust in recessed grooves while absorbing moisture in the fabric face. These mats are primarily used inside but may be used outside as well.

Wiper Entrance Mats

The Third Weapon Against
Dirt and Moisture

Wiper Entrance Mats are designed to stop any remaining dust and moisture left after using the Scraper mat and Scraper/Wiper mat. These mats are made with carpet facing to complement most interiors. These mats are for indoor use and when used in conjunction with a Scraper mat and Scraper/Wiper mat, they can stop as much as 70% to 80% of dirt and grime from being tracked into a building.

Logo Mats

Promote a Positive Image

Custom designed logo mats are a unique way to promote a company's image. Logos or other designs can be replicated on the face of numerous styles of mats. Most without any setup charge. Logo mats add a professional look to any entrance, while acting as a further barrier to keep contaminants from entering a facility.

Slip Resistant and Safety Mats

Protect from Slips and Trips

Slip resistant and safety mats help provide safe working areas for employees and visitors to facilities. Considering that 85% of worker's compensation claims are attributed to employees slipping on slick floors the utilization of slip resistant mats is an ideal solution to prevent such accidents from occurring.

Anti-Fatigue Mats

Enhance Comfort and Increase Productivity

Anti-Fatigue mats are available in a wide range of sizes, weights and materials. It has been proven that the proper use of anti-fatigue mats can enhance worker productivity by over 20%. These mats are designed for use wherever workers spend time standing and will help to eliminate muscular skeletal disorders.

Flow Through Mats

Wet Area Solution

Flow through mats allow liquids to pass through them to eliminate slip hazards. Anti-fatigue properties provide comfort when standing for long periods of time. The thick rubber helps alleviate stress on the legs, feet and lower back.

Mat Placement Guide

ENTRANCE MAT AND TILE COLLECTION

Waterhog™ Eco Grand Elite

Beauty and exceptional performance are combined in the most ecologically friendly mats The Andersen Company has produced to date. WaterHog Eco Grand Elite mats are manufactured with a permanent rubber reinforced bi-level face that will not crush providing years of superior dirt and moisture collection. WaterHog Eco mats are made with 100% PET Polyester post-consumer recycled fiber derived from used plastic bottles for the face and a 100% rubber backing that contains 20% post-consumer recycled tires. Every square foot of a WaterHog Eco mat eliminates 4 half liter plastic bottles from the waste stream. WaterHog Eco Grand Elite mats have a color coordinating fabric border and may be purchased with a cleated backing standard for carpeted floors or optional smooth backing for hard floor surfaces. Every WaterHog Eco Grand Elite mat comes with the universal recycle symbol (except # 2246) molded into the face of the mat to show visitors to your facility you are doing your part for the environment.

WaterhogTM Eco Grand Premier

Sometimes the need for a tough mat extends beyond exceptional performance to include exceptional beauty. WaterhogTM Eco Grand Premier is an amazing mat series with the performance features of our Waterhog Eco Premier and the durable attractive fabric border of our Waterhog Eco Premier Fashion combined with the choice of three different configurations of the face design.

WaterhogTM Eco Premier and Eco Premier Fashion

When the application calls for outstanding performance and beauty, WaterHog Eco Premier and Eco Premier Fashion are the answer. Waterhog Eco Premier and Eco Premier Fashion mats combine renowned WaterHog bi-level construction with the most environmentally friendly construction ever. WaterHog Eco Premier and Eco Premier Fashion mats are made with 100% post-consumer recycled PET Polyester fiber derived from used plastic bottles for the face and a 100% rubber backing that contains 20% post-consumer recycled tires. Every square foot of a WaterHog Eco mat eliminates 4 half liter plastic bottles from the waste stream. Features and Benefits

of WaterHog Eco Grand Elite, Eco Grand Premier, Eco Elite, Eco Elite Fashion, Eco Premier and Eco Premier Fashion

- Earth-friendly 30 oz. anti-static 100% post-consumer PET fabric from plastic bottles. 100% rubber backing has 20% post-consumer recycled rubber content. Available in smooth or cleated backing types **(D)**
- Unique ridged construction effectively stores dirt and moisture beneath shoe level **(A)**
- Exclusive rubber-reinforced face nubs prevent pile from crushing in high traffic areas, thereby maintaining high performance and extending product life **(B)**
- Dries quickly and won't fade or rot. When wet, the rubber-reinforced surface allows water to be wicked to the bottom of the mat away from foot traffic while providing a slip-resistant surface **(C)**
- Exclusive "water dam" border keeps dirt and water in the mat and off the floor, minimizing slip hazards and floor damage **(E)**

Construction

FACE – Molded reinforced textile

FIBER – 100% Solution-dyed PET fabric recycled from plastic bottles

PILE HEIGHT – 3/8"

FACE WEIGHT – 30 oz/sy

BACKING – SBR Rubber (20% recycled rubber from tires)

Not recommended for use in areas exposed to grease or petroleum products. Passes flammability standards DOCFI-70.

Waterhog™ DiamondCord

Features and Benefits

Proving a mat can be tough and still beautiful, WaterHog DiamondCord mats are an ideal choice for medium traffic placements. WaterHog DiamondCord mats are manufactured with a permanent rubber reinforced bi-level face that minimizes crushing to provide dirt and moisture collection. Thick and fine Polypropylene fibers are combined to produce a carpet face that wipes and scrapes at the same time. The corduroy berber look offers the ultimate in aesthetic appeal. WaterHog DiamondCord mats have a 100% rubber backing with 20% post-consumer recycled tire content. All

WaterHog DiamondCord mats come with a rubber water dam border to keep moisture and dirt from migrating off the mat. You may also choose a cleated backing standard for carpet floors or optional smooth back for hard floors.

Waterhog™ Masterpiece Select

Features and Benefits

WaterHog Masterpiece Select mats combine attractive appearance with durability. The innovative parquet design is engineered to scrape dirt and water off feet from all traffic angles and looks great as well. The WaterHog construction provides a rubber reinforced bi-level surface for long term service. Waterhog Masterpiece Select mats have a 28 oz Polypropylene face and 100% rubber backing with 20% post-consumer recycled tire content to improve the environment. All WaterHog Masterpiece Select mats come with a rubber water dam border to keep moisture and dirt from migrating off the mat.

You may also choose a cleated backing standard for carpet floors or optional smooth back for hard floors.

Brush Hog Plus

Brush Hog Plus is an ideal choice for outside applications of all commercial buildings providing a durable outside scraping surface. These attractive mats are constructed with a bi-level rubber reinforced surface to ensure maximum removal of dirt and moisture. Brush Hog Plus mats have drainable color coordinated border to allow water to drain off the mat. These earth-friendly mats have a 100% rubber backing that contains 20% post-consumer recycled car tire rubber. The tough 100% nylon top surface is solution dyed to protect the mat from damaging ultra violet light. Brush Hog Plus mats come with a flat backing only. 3/8" thickness.

Clean Stride

Indoor

red/black

Features and Benefits

- Available in two versions: Carpet/Rubber Frame with adhesive insert (Product Number 411) and Rubber Frame only with adhesive insert (Product Number 410). Adhesive inserts are sold separately (Product Number 412)
- As foot traffic passes over the mat, the WaterHog™ surface scrapes larger particles while the adhesive insert captures smaller dust & dirt. With two footsteps on Clean Stride adhesive insert, over 90% of dirt particles are removed.
- Clean Stride mats provide highly effective dirt and dust removal methods for factories, computer rooms, warehouses, school gymnasiums, health care facilities and more
- Earth-friendly rubber backing has 20% recycled rubber content. Available in smooth or cleated backing (cleated backing available in 3' and 4' widths only)
- 3/8" thickness. Not recommended for wet areas.

Standard Sizes

Mat Recycling Program

The Andersen Company is pleased to offer our customers the capabilities of recycling all obsolete or worn out rubber backed mats. We certify that none of the mats returned are placed in a landfill. The obsolete or worn out mats will be ground up to be used either in manufacturing other mats or used for boiler fuel.

GUIDELINES FOR RETURNING MATS FOR RECYCLING:

1. All mats must be returned to:
The Andersen Company
340 Cross Plains Blvd.
Dalton, GA 30721
2. The shipment must be sent PREPAID. Feel free to contact our Customer Service department for carrier suggestions if you do not have a preferred shipping company.
3. Mats must be reasonably clean and dry.
4. Mats must be stacked and strapped onto a wooden pallet or packed in a corrugated box.
5. The containers must be marked clearly and labeled in large letters, two inches high or greater, "MATS FOR RECYCLING"
6. There are no minimums for mats to be returned for recycling.
7. The mats being returned must be rubber backed mats; **NO VINYL MATS** will be recycled.

For More Information, Call us at **1-800-241-4696** or e-mail at info@andersenco.com
